

What is ActiSales®?

Sales Force Automation Software

ActiSales® is an SFA (Sales Force Automation) solution developed to provide companies the tools necessary to compete in an ever-growing sales market, while maximizing revenues and cutting operational costs. Through wireless mobile technology, automation with ActiSales allows sales teams to take orders & payments in the field, view product & inventory levels, keep track of assigned routes or customer visits, as well as transmitting data through wireless synchronization. This synchronization is done "to and from" a handheld unit, like an HP ipaq or Symbol device, and a central location where your accounting software may reside. Quickly & easily, eliminating the need for double data entry and increasing the accuracy of the orders!

ActiSales® does just what the name says. It keeps your sales team active and productive, thus increasing sales opportunities and expediting the sales cycle for a faster & cleaner turnaround of goods to your clients, while increasing the cash-flow to your business.

ActiSales® provides you with state-of-the-art technology without the need for a capital investment in servers, operating systems, and modems, or the associated costs for maintaining these.

e-Nabler ActiSales® Versions

Standard • Enterprise • Consignment • Automotive • Pharmaceutical
QuickBooks® • Peachtree® • Desktop

How does ActiSales® work?

e-Nabler ActiSales® Wireless Version

e-Nabler ActiSales® Modules

Orders • Payments • Products • Customers • Returns • Invoices
Inventory Management • Messaging • Route Management
